CATTLEYA AND CYMBIDIUM TRANSPLANTED FLASKS

FORTY TO SIXTY SEEDLINGS PER FLASK

For 1963 we offer a rich and varied list of transplanted flasks from the finest known parents. The Cattleya list alone presents over seventy-five new crosses, reds, whites, medium and dark lavender and plum shades; blues, yellows, splash and novelty varieties.

We call your attention particularly to cross 62-23 — Lc. Langford 'Copper Queen' x C. Nigritian 'King of Kings'. The pattern for this cross should be indicated by the fantastically successful Lc. Marie Ozzellas made with the same Lee Langford and C. Nigrella. As Nigritian 'King of Kings' is the most famous offspring of Nigrella, this cross could be very good indeed. You will also note we have included a new reflasking of 61-103 — the blue cross that sold out in such a short time last season.

We believe that both private and professional growers will find crosses of interest in this list and we know you will like the way our plants are grown and shipped. Some of the plants are fairly pushing the tops out of the flasks although we much prefer to remove those for our own use when they are about one inch

high. Printed instructions on planting and growing seedlings out of flask are included with each initial order that should help you to raise close to 100% of the seedlings successfully.

Approximate delivery dates are indicated, but we request some latitude as rates of growth vary somewhat. Inch high seedlings may usually be shipped earlier than the dates given.

Flask discounts this year are on a quantity basis only — 15% on orders of \$100.00, 20% on orders of \$200.00 and 25% on orders of \$500.00 or more. Plants will be shipped in flask if desired at \$1.00 per flask additional although we recommend shipping out of flask in polyethylene bags; cleaned and treated with anti-damp solution, ready for planting. Shipments are air prepaid in the United States and Canada and Air Express or Air Freight transportation collect elsewhere. California customers please add 4% sales tax. Seedling discounts as distinct from flask discounts are 10% on orders of \$100.00 or more, 20% on \$500.00

Alternate selections would be appreciated in the event one or more crosses are sold out. This applies to seedlings as well as flasks.
